# 1. Introduction

The photoatlas “Selected Synthesis Aspects in Cartography, Cartosemiotics and Atlasgraphy“ continues a series of thematic photoatlases from the Bildatlas collection of A. Wolodtschenko:

(<https://atlas-semiotics.jimdofree.com/bild-atlantotheke/>)

This photoatlas is based on the author's new presentation "On atlas cartography, atlassemiotics and atlasgraphy" at the ICA Spring 2023 symposium in Olomouc, Czech Republic.

The presentation focused on selected aspects of carto/atlas related synthesis. The atlas shows only selected examples of the synthesis of interdisciplinary characters.

## 2. Symposium ICA Spring 2023 in Olomouc, Czechia

Department of geoinformatics (prof. Vit VOŽENÍLEK), Palacký University in Olomouc, Czechia organized "SYMPOSIUM ICA SPRING OLOMOUC 2023. ATLASES: THEIR DESIGN AND USE" in cooperation with ICA Commissions on Atlases, Map Design and User Experience and under the auspices of Czech Cartographic Society. The three-day symposium took place from 3rd to 5th April 2023.

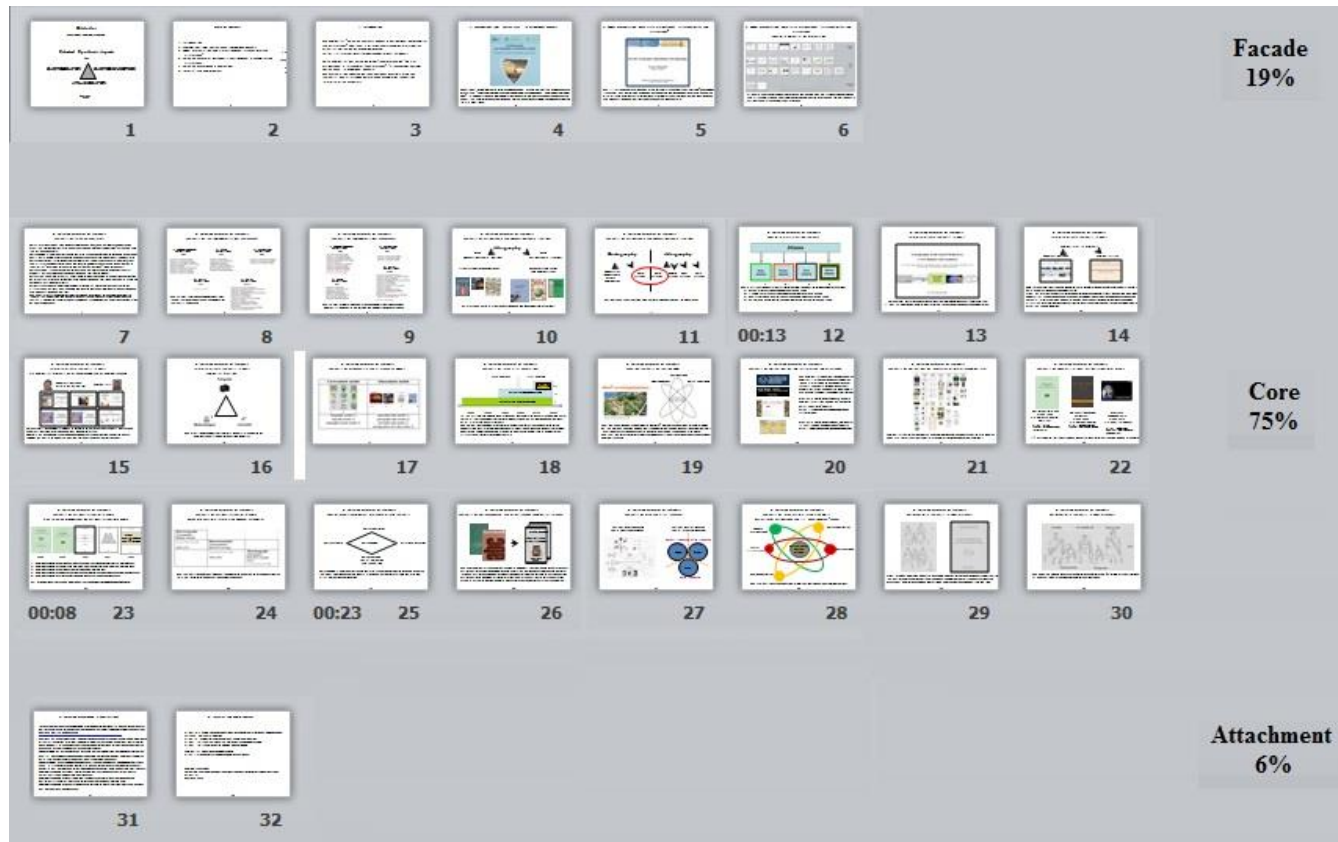

### 3. About Presentation „On atlas cartography, atlassemiotics and atlasgraphy”

The title slide of presentation „On atlas cartography, atlassemiotics and atlasgraphy”. This presentation informs on the appearance and development of three selected interdisciplinary directions - atlas cartography, atlassemiotics and atlasgraphy, the role of cartographic and non-cartographic traditions and meta-scientific tendencies, etc.

# 3. About Presentation „On atlas cartography, atlassemiotics and atlasgraphy

## Semiotic potential of presentation

Slide-related semiotic potential of presentation includes three parts: facade (19%), core (75%) and attachment (6%). 24 slides form the core of presentation with selected synthesis aspects in cartography, atlassemiotics and atlasgraphy.

## 4. Selected examples of synthesis

### Synthesis of selected new terms

**Atlas cartography** is a section of cartography that deals with the theory and practice of creating (cartographic) atlases. Scientific use of the term "Atlas cartography" has existed since the mid-20th century.

**Atlasgraphy** is a new discipline that deals with the theory and practice of creating atlas models with cartographic and non-cartographic traditions or profiles.

**Atlaskunde** (in German) or science of atlases is a new semiotic-based academic discipline that deals with theory, history and practice of design, analyzes and collection all types of atlases

**Atlassemiotics** is a section of applied semiotics that studies and analyzes all types of atlases and atlas-like models for scientific and practical purposes. Scientific use of the term "Atlas semiotics" dates back to the 2010s and the term "Atlasgraphy" to the early 2020s.

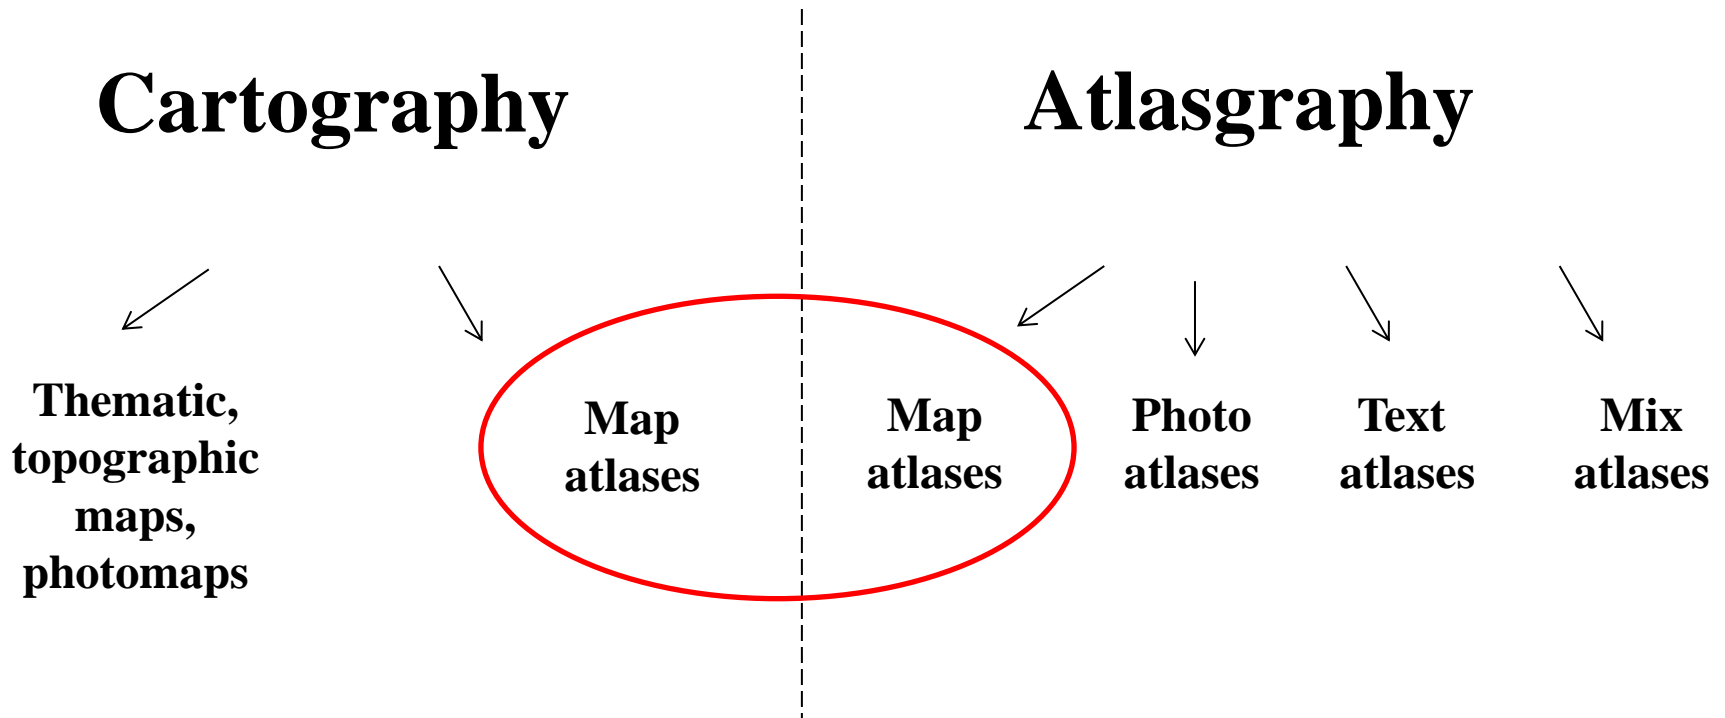

**Atlassing** (with two letters s) is a new interdisciplinary direction in the creation and research of diverse atlases (with cartographic and non-cartographic traditions). Atlassing as a trend has European cartosemiotic roots.

**Bildatlasgraphy** (in German) or photoatlasgraphy is a new discipline and a section of atlasgraphy that deals with the theory and practice of creating photoatlases with cartographic and non-cartographic traditions.

The new terms **atlassemiotics and atlasgraphy** are products of the evolution process in theoretical cartography and semiotics of the 21st century. They are focused on study and analysis conceptual semiotic and epistemological transformations with creation and acquisition of new knowledge.

## 4. Selected examples of synthesis

Synthesis of cartographic and non-cartographic traditions

Cartography and atlasgraphy have the same subject of research: the **map atlases**.

# 4. Selected examples of synthesis

Synthesis of cartographic and non-cartographic traditions

## Atlasgraphy

40%

Non-cartographic traditions

60%

Cartographic traditions

**Illustrated atlases, Bildatlases**

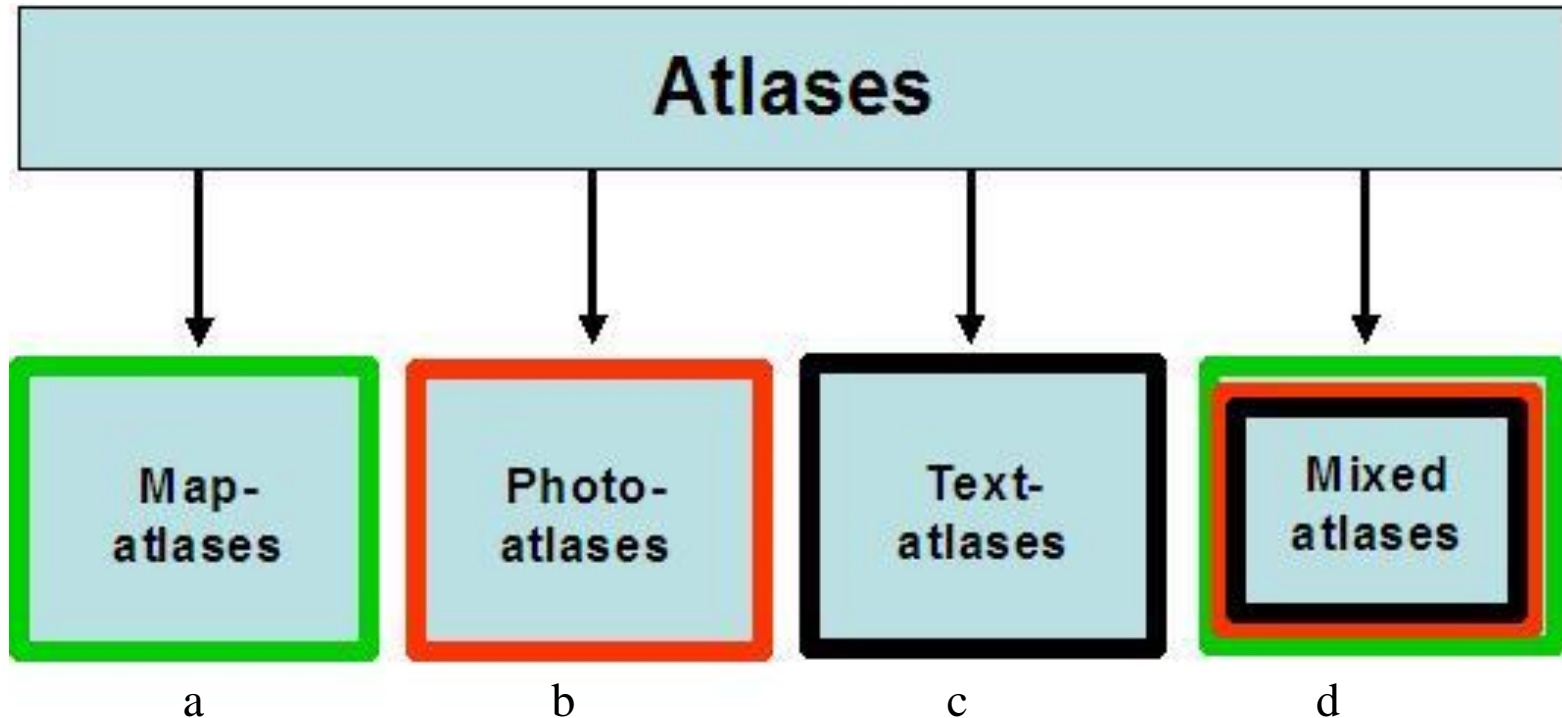

**Map-related atlases and photoatlases**

Atlasgraphy unites all atlases with cartographic and non-cartographic traditions.

## 4. Selected examples of synthesis

Synthesis of cartographic and non-cartographic traditions  
Semiotic classification

The classification of all atlases as semiotic models includes the following four main groups:

a) Map atlases (variable MAP dominates with  $> 50\%$ )

b) Photo atlases (the variable FOTO/BILD dominates with  $> 50\%$ )

c) Text atlases containing text (the variable TEXT dominates with  $> 50\%$ )

d) Atlases with mixed content (without dominance of a variable with  $> 50\%$ ).

## 4. Selected examples of synthesis

Synthesis of cartographic and non-cartographic traditions

Map-centric and atlas-centric models

Cartosemiotic models	Atlassemiiotic models
 <p data-bbox="285 879 741 919">1                      2                      3</p>	 <p data-bbox="993 782 1789 822">1                      2                      3                      4</p>

# 4. Selected examples of synthesis

## Interdisciplinary synthesis in praxis

### **Cartography in the Social Media Era: A New Balance and Synthesis**

D. R. Fraser Taylor, Romola V. Thumbadoo (Ottawa, Canada), Ilya Zaslavsky (San Diego, USA)  
and Alexander S. Wolodtschenko (Dresden, Germany)

ICC 2021, Florence, Italy

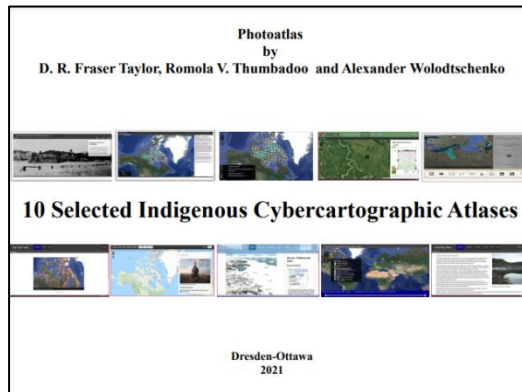

Screenshot of start page of presentation at the ICA Conference 2021 in Florence, Italy. It was an example of interdisciplinary synthesis with cybercartography and photoatlassing.

# 4. Selected examples of synthesis

## Interdisciplinary synthesis in praxis

### Photoatlases in projects

Cybercartography

Photoatlassing

Two screenshots of title pages of photoatlases are examples of interdisciplinary synthesis in praxis with cybercartography and photoatlassing.

Prof. D. R. Fraser Taylor is author of Cybercartography concept (1997), founder and director of Geomatics and Cartographic Research Centre (GCRC), Department of Geography and Environmental Studies, Carleton University, Canada. The synthesis of cybercartography and photoatlassing (after Wolodtschenko 2021) characterizes a new phase of multidiscipline cooperation in practice and methodology.

# 4. Selected examples of synthesis Interdisciplinary synthesis in praxis

## Six photoatlas projects by R. Thumbadoo and A. Wolodtschenko

Cybercartography/  
Circle of All Nations

Photoatlassing

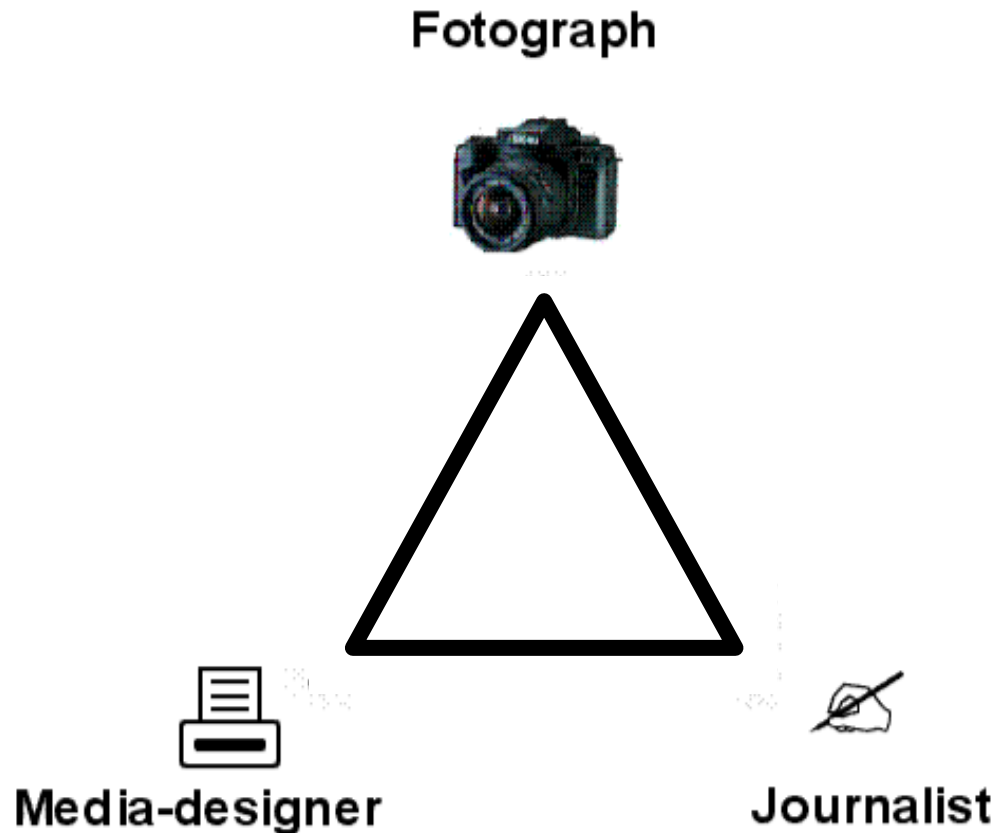

Screenshots of 6 photoatlas projects are examples of interdisciplinary synthesis in praxis with cybercartography, Circle of All Nations and photoatlassing.

Romola V. Thumbadoo is PhD Geography at the Geomatics and Cartographic Research Centre (GCRC) of Carleton University in Ottawa and the Circle of All Nations (Ottawa).

## 4. Selected examples of synthesis

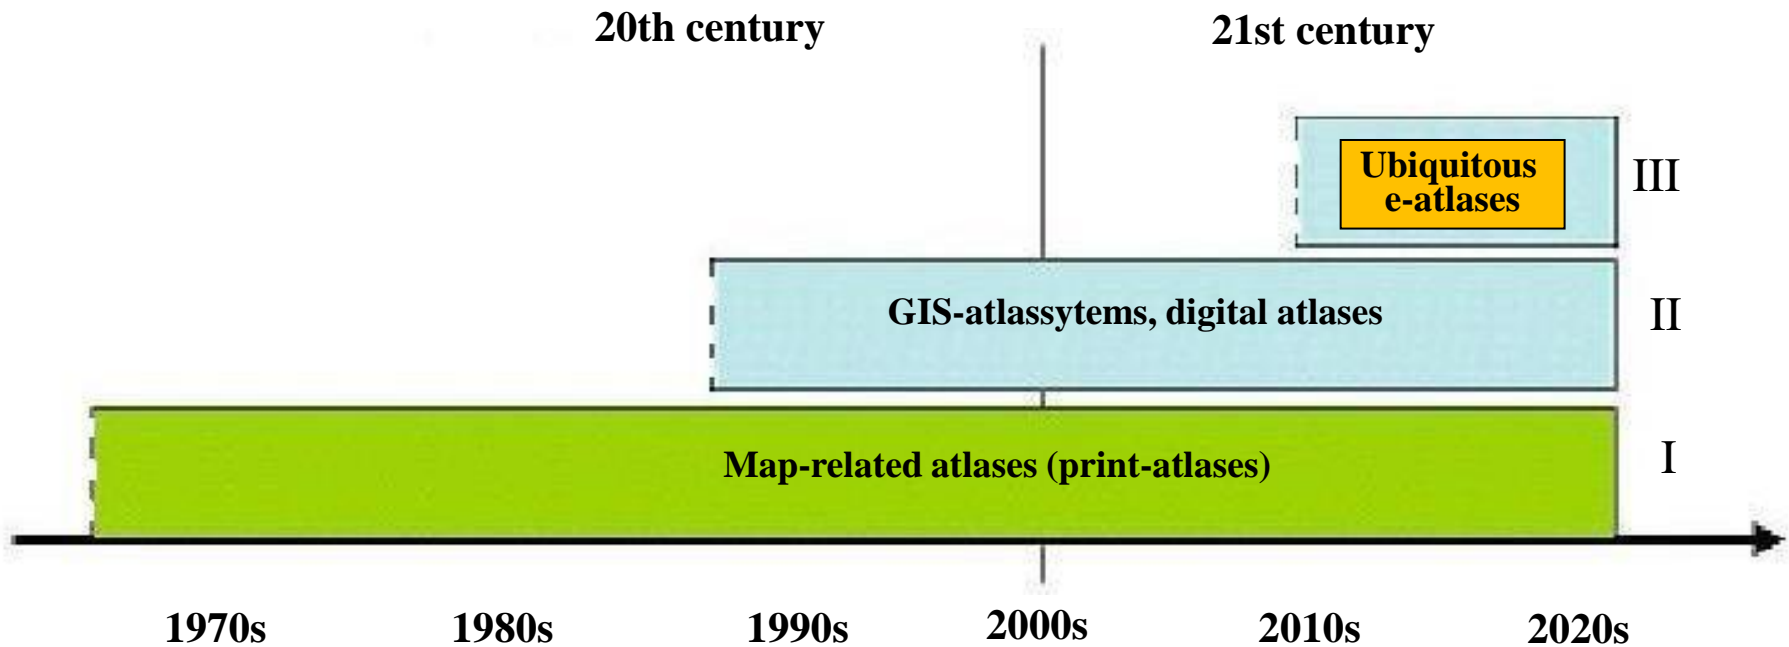

Interdisciplinary synthesis in praxis  
Photoatlas creation

The creation of photoatlases requires a synthesis in the practice of photographers, media designers and journalists.

## 4. Selected examples of synthesis

### Synthesis of three atlas generations

In the 21st century, modern society received a new generation of atlases - ubiquitous atlases (map atlases and photoatlases for smartphones and tablets) that complemented traditional print atlases and GIS atlas systems.

The ubiquitous e-photoatlases (for smart phones and tablets, etc.) belong to the **third generation** of atlases (Wolodtschenko 2012, 2020). The third generation of atlases brought **new terms and disciplines** into atlas-related practice and theory, such as: photoatlassing, atlasgraphy, semiotics of photoatlases, etc.

# 4. Selected examples of synthesis

## Function synthesis of section UKA

DGS e.V.

Deutsche Gesellschaft für Semiotik

Associazione dell'Internazional Association for Semiotic Studies (IASIS)

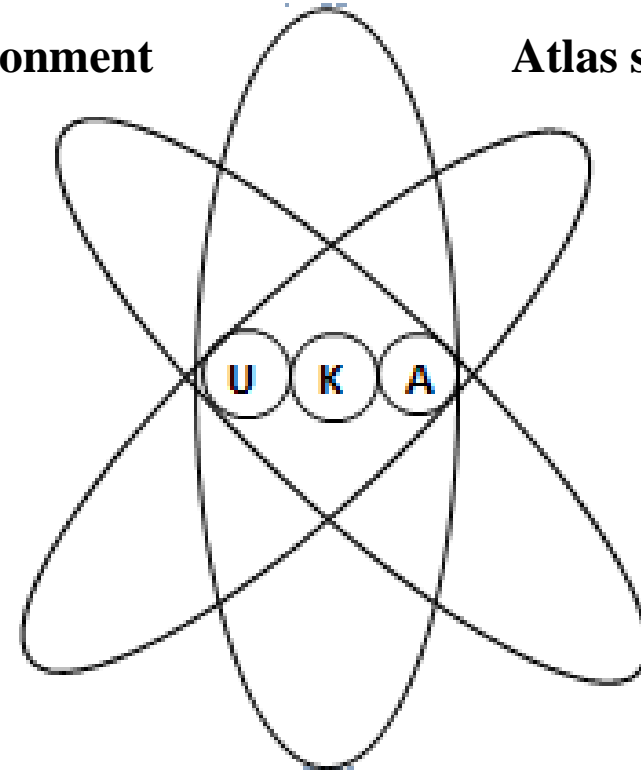

Umwelt- und Karto-/Atlas-Semiotik

Cartography

Environment

Atlas semiotics

Section „Environment and Carto/Atlas Semiotics“ (Umwelt- und **K**arto/**A**tlassemiotik/**U**KA) of the German Semiotic Association is a combi-section. Section connects three function levels: environment, cartography and atlas semiotics. The section is unique one in the world. The section has cartosemiotic roots and founded 2015. Chairs are Monika Huch and Alexander Wolodtschenko.

## 4. Selected examples of synthesis

Synthesis of collections of two institutes and two private web

The photoatlas collection is supported by the TUD Institute of Cartography (approx. 100 image atlases stored on the computer center server) and Spatial Information Systems Laboratories of the University of California, San Diego (approx. 100 photoatlases stored).

A private collection of about 250 thematic photoatlases is available on the "Carto- and Atlas Semiotics" website.

<https://atlas-semiotics.jimdofree.com/bild-atlantotheke/>

A private collection of about 25 photoatlases is available on the Monika Huch's website:

<http://www.geokultur-erleben.de/buecher.html>

## 4. Selected examples of synthesis

### Synthesis of non-institutional carto/atlassemiotics media

Cartosemiotic issue  
Since 1998  
(in German, English,  
Russian)

<https://atlas-semiotics.jimdofree.com/projekte/>

Meta-carto-semiotics  
e-journal  
Since 2008  
(in German, English)

<http://ojs.meta-carto-semiotics.org/index.php/mcs>

Almanac  
«Geocontext»  
Since 2013  
(in English, Russian)

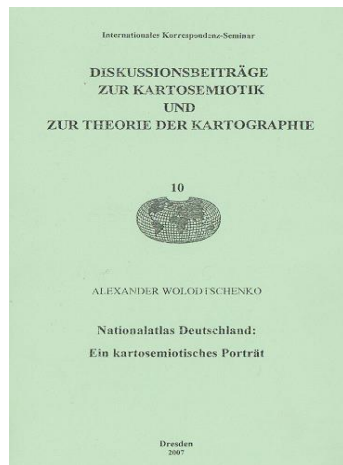

<https://www.geocontext.org/index.php/geocontext>

It's paradoxical, but there are only 3 non-institutional carto/atlas semiotic e-media in the world.

# 4. Selected examples of synthesis

## Synthesis of carto-atlassemiotic theory

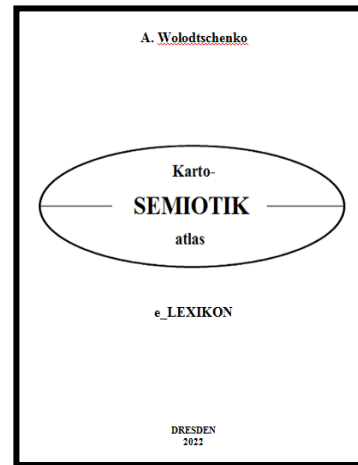

### Five selected monographs on carto-atlassemiotic theory

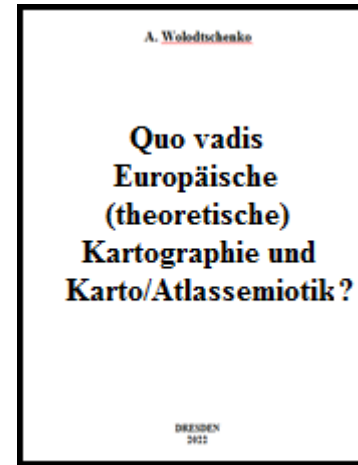

2007

2020

2021

2021

2022

1. Wolodtschenko, A.: Nationalatlas Deutschland: Ein kartosemiotisches Porträt. Dresden 2007.
2. Wolodtschenko, A.: Semiotische Evolution in der Kartographie und Atlassing. Dresden 2020
2. Wolodtschenko, A.: Karto-Atlassemiotik. Lexikon. Dresden 2021
3. Wolodtschenko, A.: Quo vadis Europäische Kartographie und Karto/Atlassemiotik? Dresden 2021
4. Wolodtschenko, A.: From Metacartography to Metaatlasgraphy. Dresden 2022

All monographs are available from: <https://atlas-semiotics.jimdofree.com/news-info/>

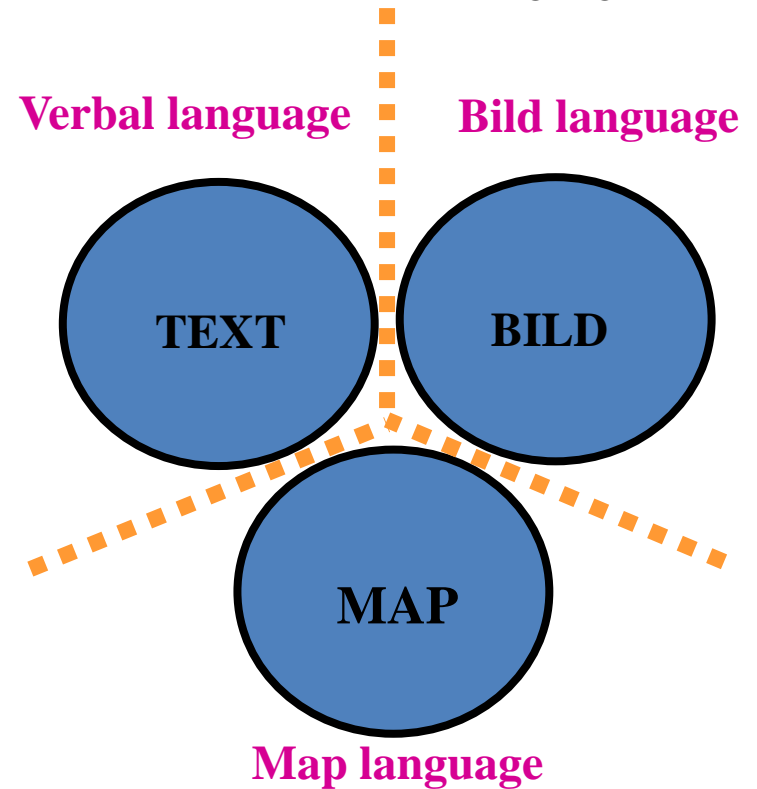

# 4. Selected examples of synthesis

## Synthesis of map and atlas languages

System of map language  
(with four sub-languages)

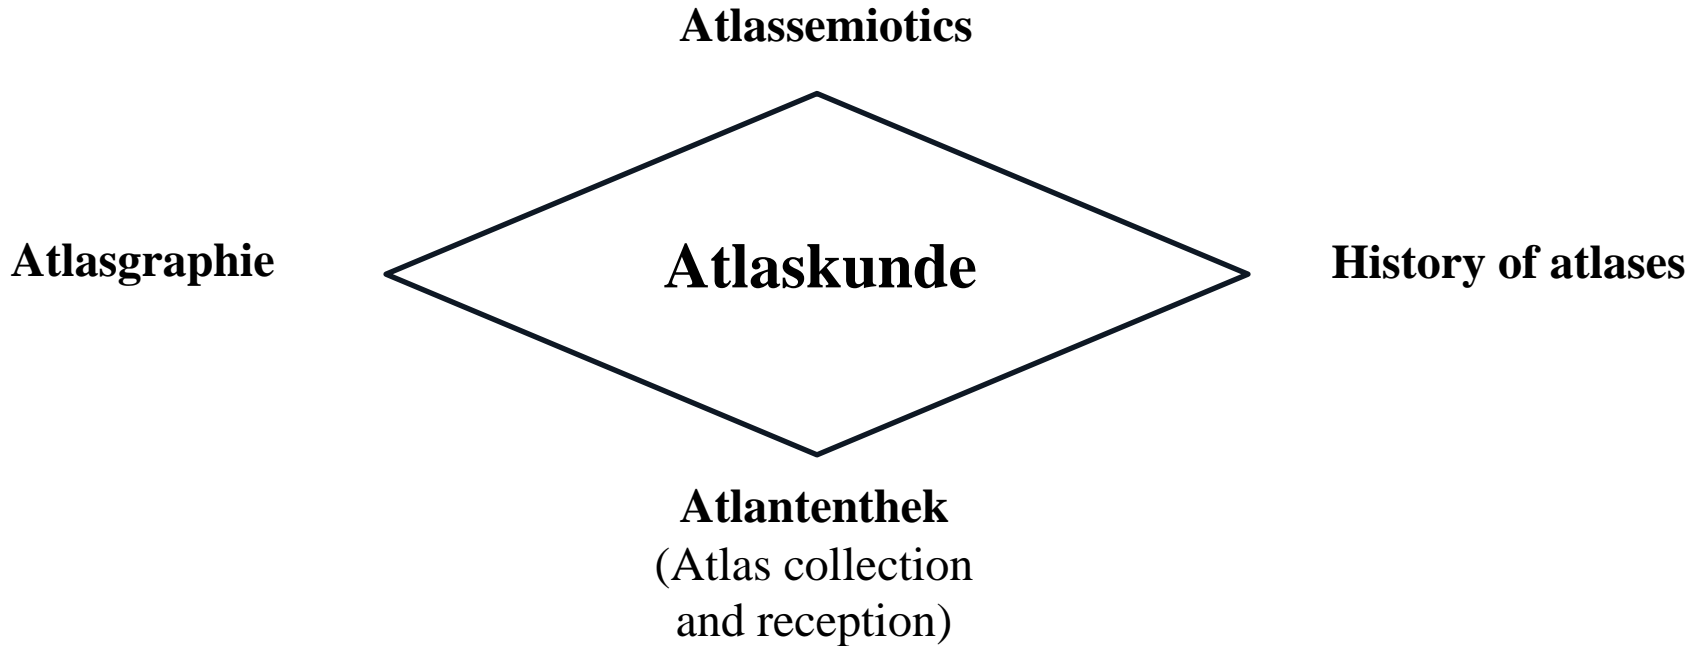

System of atlas language  
(with three sub-languages)

## 4. Selected examples of synthesis

### Semiotic-epistemological meta-disciplinary synthesis

**Atlaskunde** (in German) or science of atlases is a new semiotics-based academic discipline that comprises four sub-disciplines or parts: atlasgraphy, atlas semiotics, history of atlases, and atlas collection and reception.

## 4. Selected examples of synthesis

### Synthesis of Kartenkunde and Bildatlaskunde (photoatlas science)

The new photoatlas science (Bildatlaskunde, in German) as a part of science of atlases reflects a cartosemiotic evolution (Wolodtschenko 2021) at the interface of cartography and semiotics through various development or conversion processes from cartography to atlasgraphy, from cartosemiotics to photoatlas semiotics, from the atlas analysis to atlas data analysis, from graphic variables to model-semiotic metavariables, parity-semiotic atlas classification, etc.

## 4. Selected examples of synthesis

### Synthesis of carto-atlassemiotic theory

#### Three metacarto/atlas-related concept trajectories

<b>Metacartography</b> (Cartography) Primary concept		
—————→ 1960-1970	<b>Metacartosemiotics</b> (Cartosemiotics) Derivative concept	
	—————→ 1990-2000	<b>Metaatlasgraphy</b> (Atlasgraphy) Derivative concept 2020s —————→

The synthesis of theoretical concepts is demonstrated with using of three metacarto/atlas-related trajectories 1960-1970s, 1990-2000s and 2020s.

## 4. Selected examples of synthesis

### Synthesis of metaatlasgraphic democratization principles

<b>1. Parity of <u>Atlas Classification</u></b>			
Map-atlases	<u>Photoatlases</u>	Text-atlases	<u>Mixatlases</u>
<b>2. Parity of research methodology for all atlases</b>			
Creation and using of map atlases	Creation and using of <u>photoatlases</u>	Creation and using of text-atlases	Creation and using of <u>mixatlases</u>
<b>3. Parity of Semiotic Analysis and Portraying</b>			
Maps		Atlases and <u>metaatlases</u>	
<b>4. Parity of Function Clusters</b>			
<u>Education cluster</u>	Science-research <u>cluster</u>	Publishing and <u>popularization cluster</u>	
<b>5. Parity of Traditions</b>			
Cartographic traditions		Non cartographic traditions	
<b>6. Parity of Acquire Knowledge</b>			
Mapping and cartographic knowledge		<u>Atlasing and atlasgraphic knowledge</u>	

Screenshots of 6 metaatlasgraphic democratization principles (after Wolodtschenko 2022).

Metaatlasography forms new views on its role in the study of atlases as basic semiotic-epistemological models with cartographic and non-cartographic traditions. Metaatlasography democratizes cartographic and non-cartographic traditions as well as develop the evolutionary processes of transformation of map/atlas knowledge.

# 4. Selected examples of synthesis

## Synthesis of the ICA Commissions (2019-2023)

### 1) CARTOGRAPHY Traditions (8)

Commission on Art and Cartography  
Commission on Cartographic Heritage  
Commission on Cartography and Children  
Commission on Cartography in Early Warning and Crisis Management  
Commission on the History of Cartography  
Commission on Marine Cartography  
Commission on Mountain Cartography  
Commission on Planetary Cartography

### 2) MAP Traditions (5)

Commission on Map Design  
Commission on Map Production and Geoinformation Management  
Commission on Map Projections  
Commission on Maps and Graphics for Blind and Partially Sighted People  
Commission on Maps and the Internet

### 3) MAPPING Traditions (3)

Commission on Sensor-driven Mapping  
Commission on Topographic Mapping  
Commission on Ubiquitous Mapping

### 4) Atlas Traditions (1)

Commission on Atlases

### 5) MIX Traditions (11)

Commission on Location Based Services  
Commission on Open Source Geospatial Technologies  
Commission on SDI and Standards  
Commission on Toponymy (ICA-IGU joint commission)  
Commission on User Experience  
Commission on Visual Analytics  
Commission on Cognitive Issues in Geographic Information Visualization  
Commission on Education and Training  
Commission on Generalisation and Multiple Representation  
Commission on Geospatial Analysis and Modeling  
Commission on Geospatial Semantics

The author has divided 28 ICA commissions into 5 thematic groups reflecting the 2019-2023 commission synthesis.

Where is a place for atlas cartography? Atlas cartography belongs to the Commission on Atlases.

# 4. Selected examples of synthesis

## Synthesis of the ICA Commissions (2023-2027)

### 1) CARTOGRAPHY

#### Traditions

(8)

Commission on Art and Cartography  
Commission on Cartographic Heritage  
Commission on Cartography and Children  
Commission on Cartography in Early Warning and Crisis Management  
Commission on the History of Cartography  
Commission on Marine Cartography  
Commission on Mountain Cartography  
Commission on Planetary Cartography  
Commission on Atlas Cartography

### 2) MAP

#### Traditions

(5)

Commission on Map Design  
Commission on Map Production and Geoinformation Management  
Commission on Map Projections  
Commission on Maps and Graphics for Blind and Partially Sighted People  
Commission on Maps and the Internet

### 3) MAPPING

#### Traditions

(3)

Commission on Sensor-driven Mapping  
Commission on Topographic Mapping  
Commission on Ubiquitous Mapping

### 4) MIX

#### Traditions

(12)

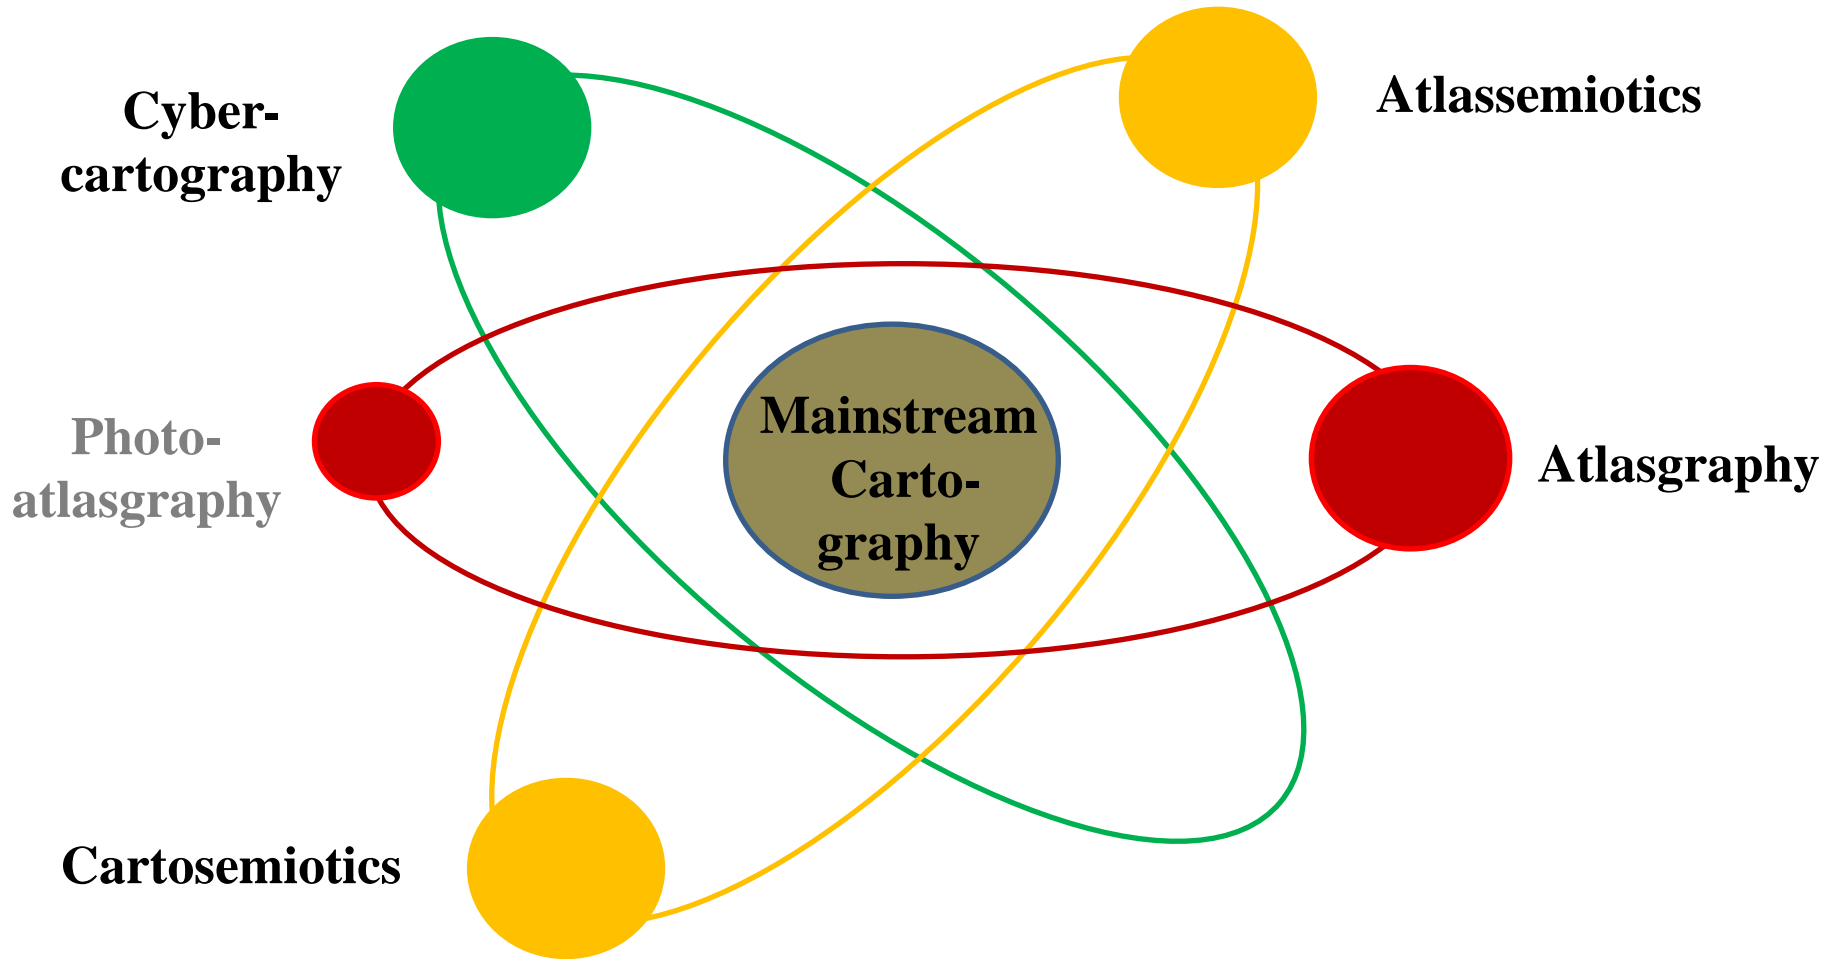

Commission on Location Based Services  
Commission on Open Source Geospatial Technologies  
Commission on SDI and Standards  
Commission on Toponymy (ICA-IGU joint commission)  
Commission on User Experience  
Commission on Visual Analytics  
Commission on Cognitive Issues in Geographic Information Visualization  
Commission on Education and Training  
Commission on Generalisation and Multiple Representation  
Commission on Geospatial Analysis and Modeling  
Commission on Geospatial Semantics  
Commission on Atlasgraphy

The author propose two new atlas-related commissions for 2023-2027:  
Commission on Atlas Cartography and Commission on Atlasgraphy

## 4. Selected examples of synthesis

Synthesis of three carto/atlas-related orbits

Mainstream cartography and its „environment“ (2023)

The synthesis of 3 selected carto/atlas-related orbits is carried out without contact with the ICA commissions.

## 4. Selected examples of synthesis

### Cartosemiotic synthesis in comics (1990s and 2020s)

Prof. B.Koen from the University of Sofia created two comics for Cartosemiotic Symposium 1994 in Dresden. Symposium was initiated by J.Pravda and A.Wolodtschenko. The comics shows a cartosemiotics development 1990 and 1994.

The updated comics 2023 (after A. Wolodtschenko) bears the name "Atlassemiotics and atlasgraphy as new children in semiotic-epistemological kindergarten".
